MAY 2017

GLS UNIVERSITY INKS A GREEN PACT WITH CENTRE FOR ENVIRONMENT EDUCATION

GLS University entered into a collaboration agreement with Centre for Environment Education (CEE) to jointly teach environment studies to all GLSU students, and engage students and faculty members in environment awareness and conservation projects.

Shri Sudhir Nanavati, President, GLS University and Shri Kartikeya Sarabhai, Director, CEE signed the agreement in the lush green environs of CEE on April 29, 2017. Also representing GLSU were Dr. B H Joshi, Provost, GLSU; Dr. Hitesh Ruparel, Director General, GLSU; Dr. Dharmesh Shah, Registrar, GLSU; Dr. Mayuri Pandya, coordinator, GLS Law College; and Dr. Avani Desai, Dean, FBA, GLSU, Mr. Dhiraj Gidwani represented CEE.

CEE was created in recognition of the importance of environmental education in India's overall environment and development strategy. Established in 1984, CEE is

a "Centre of Excellence" of the Ministry of Environment, Forests and Climate Change, Government of India, working in the field of Environment Education.

CEE works in a wide range of sectors, target groups and geographical areas. Its prime objective is to promote informed and balanced appreciation of environmental and developmental issues in a manner conducive to action

for the conservation and wise use of natural resources. The work method adopted draws upon both traditional and modern knowledge systems, and employs a range of techniques and technologies of communication and networking. CEE's programmes and projects over three decades have explored the emerging models of development to identify and promote those which are contextually sustainable. The

methods employed include working with communities, sharing knowledge with policymakers, and capacity building at sub-national, national and trans-national levels. These have yielded opportunities to meaningfully bring learning and insights from the grassroots to bear on policies and actions. CEE is committed to ensuring that due recognition is given to the role

THE HEAT IS ON!!!

keeping cool without an air-conditioner, with less usage of electricity, and with just a few interesting lifestyle changes. Go right on to the centre spread to see more!

In the meanwhile, when everyone is talking about the

soaring temperatures, GLS Voice also gives you some more interesting stuff to talk about during this heat! Read on to know some more summer trivia.

Summer is the by far the busiest time at movie theaters, and Hollywood always hopes to earn a significant portion of total annual ticket sales through summer blockbuster months.

In the summer heat, the iron in France's Eiffel Tower expands, making the tower grow more than 6 inches.

The month of June was named after either Juniores, the lower branch of the roman Senate, or Juno, the wife of Jupiter.

Marc Antony named the month of July, in honor of Julius Caesar.

Scientists argue that summer babies are perhaps significantly more likely to suffer from mood swings than babies born in other seasons.

Suicides actually increase during the summer months. Research suggests several reasons, including increased interaction with other people and seasonal hormonal changes.

Warmer weather causes certain diseases to peak during the summer, such as Valley Fever, West Nile Lyme Disease, and food poisoning.

July, the hottest summer month in the Northern Hemisphere, is National Ice Cream Month in USA.

IS YOUR PRIVATE WHATSAPP ACCOUNT SAFE?

By Nirja Vasavada

It was a peaceful Sunday afternoon. The heat was getting to me and I had shut myself up in the cool of my room. Suddenly my phone buzzed, and cursing the interruption, I checked the Whatsapp message I saw blinking on my phone. It was (supposedly) from a colleague – a very intelligent and knowledgeable one, at that. Now, cursing this particular colleague, I opened the message. The message was simply ‘Hi’ with a smiley. When I responded to that message, this supposed colleague texted back saying “give me the code that you have received as an sms”. There was no reason not to trust this fellow, and I gave the code. Hardly had I clicked on the send button, and whoosh! My Whatsapp account escaped from my control. Cursing the colleague yet again (poor soul!), I tried putting the 6 digit code in the given boxes. “You have recently registered in this account,” I was told.

Flabbergasted, I tried to uninstall the app, but the same message kept repeating itself. In half an hour, I received a call from another colleague (also a Voice team member), extremely

worried, inquiring, “Is all okay?” And I blurted out, “well, yeah, all is well, except for my Whatsapp and Mr. Colleague, who played with it! And now I have no control on my Whatsapp.” She then told me that she had also received a message on Whatsapp from my account, and when she gave the code, her Whatsapp also escaped from her control. After a while, she called back with the information that yet another Voice team member had also the same experience.

We figured that this certainly looked like hacking at a very large scale. There was no use trying to reinstall Whatsapp because we received the same instruction. To top it all, we also started getting calls from our relatives, colleagues and whoever was on our contact lists, that I asked them to enter the code, or I removed them from a group or I asked them to make me an admin of some Whatsapp group.

By this time, our common sense kicked in and we realized that because we did not get the chance to delete our Whatsapp accounts when we lost control of them, the hacker was now handling the account. Slowly, we also understood that this meant that the hacker had access to our Whatsapp

accounts and probably of our other accounts, too. (Yes, when some things cause one to be shocked and dumbfounded, simple things also take time to make sense),

Fortunately, another colleague who had been the victim of this chain hacking in the past knew someone in the cyber crime cell, Baroda. The cyber crime cell guided us to reinstall the app, and to go for the call option of the code. The Cell also gave us some security tips (shared in this article below) which would then ensure that the Whatsapp account is not hacked. And, no, the hacker was neither a neighbour nor a student, it was some person sitting somewhere in France!

The next day we went to the Cyber Crime Cell, Ahmedabad, and were pleasantly surprised to see the cooperative approach of the police. Mr. Jhinjhuwadia (Assistant Police Officer) and Mr. Digvijay Jadeja (Police Inspector) assured us that there is no way the hacker could have the access to our other accounts. They also reassured us that the hacker would only have the access to our group chats and group contacts, and nothing more than that. Therefore, whatever mischief happened, it was restricted

only to group activities.

So how did it feel? It felt as if someone has opened your personal diary. The very thought that there is a hacker sitting somewhere and hacking your information, is unnerving. It could be your next door neighbour who you argued with over car parking in the morning or it could be your student who you caught copying during an exam! But the fact was, we did NOT know. We did not know who, why and where – and that left us jittery beyond imagination. Not because one has important data saved on the phone, not because one has personal pictures or chats - but simply the knowing that someone has intruded your privacy! The very fact that a complete stranger can chat with anyone in your name makes you furious, and we were.

That mixed feeling of disgust, anger, fear and helplessness is difficult to describe in words. Also, whoever heard this story said, “But you are a fool to give the codes like this.” Yes. We know. We had and have been warned by so many people. But it is impossible to suspect someone you know so closely. It is so easy to fall prey, and then feel foolish about yourself. The assurance given by the police eased these feelings a little bit, but still, even after one week, I get alarmed when I receive a Whatsapp message saying ‘Hi’!

How do you secure your account?

- Go to Whatsapp settings – accounts – two-step verification. Activate this feature. Two-step verification means that your account will require the your own code (your own

password) over and above the code that Whatsapp gives. This will ensure that even if the hacker does hack into the Whatsapp code, they will not be able to get the control of your account unless they have your own password. And do not share that password (or any password for that matter) with anyone.

- How do you know you have control of your own account? Go to settings – Whatsapp web. There will be two icons. Desktop and phone. If you are using Whatsapp from your phone device, it will show green tick on the phone option. Whatsapp on phone can be used only from one phone device at a time, so you know it’s you. If it shows desktop, and you have not logged into Whatsapp web through your desktop, then it’s not you, it’s the hacker.
- Do not share any important document/picture or document through Whatsapp. It is very common these days to do so. If we have forgotten something like an Aadhar card, for example, it’s so convenient to just “click a pic and send.” But make sure you delete that image from the memory of Whatsapp and your phone as well.
- Most importantly, do not share any code with ANYONE. You never know the hacker may message you as your family member, too.

(The writer is an assistant professor in English and Communication at FBA-NRBBA, and one of the three Voice team victims of Whatsapp hacking!)

By Prin. Dr. Rishikesh Mehta
History :

The term ‘narco-analysis’ is derived from the Greek word *narkē* (meaning “anesthesia” or “torpor”) and is used to describe a diagnostic and psychotherapeutic technique that uses psychotropic drugs, particularly barbiturates (sedative), to induce a stupor (dullness) in which mental elements with strong associated affects come to the surface, where they can be exploited by

means of a partial dissolution of consciousness, undoes the complex syntheses of waking mental life and accesses mental content that is more automatic.

During the Second World War, the technique of the so-called truth serum or the narco-analysis was developed to help soldiers who had broken down under the strain of battle.

Procedure :

Experts inject a subject with Sodium Pentothal or Sodium Amytal (also known as truth

serum). The dose is dependent on the person’s sex, age, health and physical condition. This is done under the constant supervision of medical experts. A wrong dose can result in a person going into a coma, or even death. The rate of administration is controlled to drive the accused slowly into a hypnotic trance.

How does the truth serum work?

After an injection of truth

eXpert Opinion Series at Faculty of Management

It is imperative for management students to be aware of the external environment, industrial scenario and the current prospects of the industry. To provide pragmatic wisdom to students who are at the threshold of their professional careers, GLS Faculty of Management organizes eXpert Opinion series, a colloquium and discussion series in diversified sectors such as Banking, IT, Engineering, Media and Retail domains. Speakers from corporate bigwigs like Yes Bank Ltd., Bombay Stock Exchange (BSE), Harsha Engineering and many more visited the campus and shared their experiences.

The mode of knowledge sharing is through lecture series and panel discussions coupled with formal and informal discussions with participants from management programmes of GLS University. The details of guest speakers for eXpert Opinion series 2017 are as under:

Ms. Rachita Shah, Assistant Vice President (Business Banking), Yes Bank Ltd.

A stimulating Guest lecture was conducted by Ms. Rachita Shah on 'Credit Lending and Appraisal Process'. Chartered Accountant by profession, she has an experience of over 10 years.

Mr. Jayesh Tank, General Manager-IT, Harsha Engineering

Mr. Tank delivered a scintillating guest session on 'Enterprise Resource Planning' for I year PGDM students.

Mr. Mahesh Pandya, Sr. Executive, BSE

An awe-inspiring lecture on

'Overall functioning of BSE' was delivered by Mr. Pandya. With an experience of over 22 years, he briefed the students about the nitty-gritty's of Bombay Stock Exchange.

Mr. A.B. Raju, Partner, Biz Trans Consulting

Mr. Raju has an experience of over 25 years and successfully runs his company in the name of 'Biz Trans Consulting'. He delivered a fascinating guest lecture in the area of Operations Management.

Mr. Nirav Vadodariya,

Owner, Vadodariya & Co.

An eye opening session on 'Practical aspects of Taxation' was conducted by Mr. Vadodariya on the subject of 'Corporate Taxation'. He has a vast experience of over 11 years in the area of taxation.

Mr. Jatin Chaudhary, Co-founder, Echai

Mr. Chaudhary delivered an enriching guest session on 'Risk and Challenges of Entrepreneurship' on the subject of Entrepreneurship Development.

CONTINUED FROM PAGE-1 of education in the promotion of sustainable development.

On the other hand, GLSU has imbibed the philosophy of 'Excellence in Education' from its sponsoring body Gujarat Law Society. With this in mind, it aims to provide students with the most current, relevant and contemporary in content and pedagogy. Therefore, in the area of Environment Studies, CEE was the natural partner to achieve these goals.

For the GLSU team that visited CEE, it was a welcome escape into a campus that belies

its location through its flora and fauna. After completing

the signing formalities on a historical wooden table that

INTERNET OF THINGS (IOT)

By Prof. Ankita Kanojiya,

Wow! That was smart!! Don't act too smart!! Both these are commonly heard and said. But little do we realize that soon everything is going to be Smart. The concept that is revolutionising the way people live, work, play, travel, and perform all their other activities is ubiquitously known as "IoT" – the Internet of Things. The "Internet" is as we all know the "Network of networks" enabling access to abundant data and applications; while "things" can be literally anything. It can be a person like you and me or any sensor enabled device or any other appliance. In short, The IoT is a massive network of connected "things". The connections can be between people and people, people and things, and things and things. The evolution of the IoT concept is the result of the convergence of the information technology and electro mechanics technology. The first internet appliance was a Coke machine at Carnegie Mellon University in the early 1980s. The programmers could connect to the machine over the internet to check the status of the machine and govern whether or not there would be a cold drink awaiting them.

There are several practical applications demonstrating the ways devices function in a smart way. SMART HOMES comprise of appliances fridges, doors, dustbins, cars, home heaters, etc that are sensor operated. SMART AIRPORTS adorn trollies, baggage tags, boarding passes with sensors to augment the tracking, security and maintenance. Experts are carving SMART CARS enabling parents to monitor the driving, get road conditions, information about diversions if

any, through sensors that seamlessly connect the drivers to the outside world. SMART FARMING is increasingly helping farmers to yield a better volume of crops, govern the health of crops and their quality, thus enabling productive and sustainable agricultural production. SMART MANUFACTURING with a multitude of sensors can control processes more precisely, raising efficiency. SMART INFRASTRUCTURE with the sensors in structural elements as beams, rods, pillars, etc. notify the wear and tear or replacements of facilities, thereby avoiding major accidents or disasters. SMART HEALTH can be maintained through wearables as smart watches, sensor based operations, health monitoring through integrated chips etc. SMART ENVIRONMENT has sensors that monitor levels of various poisonous gases and emissions and notify in case they reach alarming levels. SMART TV's tune in to the preferred channels as and when the audience changes.

Thus, the future is imprinted to have various gadgets and appliances that are the strings in web of IoT.

To put all in one sentence, it is no hype to say that the future tenet shall be "Anything that can be connected, will be connected."

(The writer is faculty at FCAIT – GLSICA)

has been in use since the establishment of CEE, Shri Kartikeya Sarabhai presented Shri Sudhir Nanavati with a beautiful image of the Great Indian Tiger created through stippling, and a catalogue of Indian best practices in environment conservation painstakingly documented by CEE.

Shri Kartikeya Sarabhai himself gave the GLSU team a tour of the campus. It was a delight to see the transformation carried out by the CEE team – converting a wildly overgrown piece of land into a beautiful

campus that more than justifies the work carried out there. The GLSU team was also held spell-bound by the exhibition studio at CEE that works on exhibition design for various organisations, including a centennial exhibition for the Sabarmati Ashram to be unveiled in July.

GLSU looks forward to working closely with CEE in the area of Environment Education. We hope we can create future citizens, professionals and entrepreneurs who focus on all three Ps – People, Planet and Profit.

THE BEST WAY TO PASS TIME IN SUMMER: READ!!!

These lines from different books of children's literature might encourage our young ones (not only young ones!) to read during their summer vacation. GLS Voice presents to you some interesting lines from some very, very interesting books! Take a look at these, and we hope you go on to read the books!

Name

A. Once upon a time there were four little Rabbits, and their names were Flopsy, Mopsy, Cottontail, and Peter Rabbit.

The Tale of Peter Rabbit, Beatrix Potter

B. Once there were four children whose names were Peter, Susan, Edmund, and Lucy.

The Lion the Witch and the Wardrobe, C S Lewis

C. My father's family name being Pirrip, and my Christian name Philip, my

infant tongue could make of both names nothing longer or more explicit than Pip. So, I called myself Pip, and came to be called Pip.

Great Expectations, Charles Dickens

Starting out from home

A. In a hole in the ground there lived a Hobbit.

The Hobbit, J R R Tolkien

B. The mole had been working very hard all morning, spring cleaning his little home.

The Wind in the Willows, Kenneth Grahame

C. Mr and Mrs Dursley, of number four, Privet Drive, were proud to say that they were perfectly normal, thank you very much.

Harry Potter and the Philosopher's Stone, J K Rowling

D. Harry was used to spiders, because the cupboard under the stairs was full of them, and that was where he slept.

Harry Potter and the Sorcerer's Stone, J K Rowling

Cut to the action

A. Lyra and her daemon moved through the darkening Hall, taking care to keep to one side, out of sight of the kitchen.

Northern Lights, Philip Pullman

B. Here is Edward Bear, coming downstairs now, bump, bump, bump, on the back of his head.

Winnie the Pooh, AA Milne

C. There was a hand in the darkness, and it held a knife.

The Graveyard Book, Neil Gaiman

D. My dear, here we must run as fast as we can, just to stay in place. And if you wish to go anywhere you must run twice as fast as that.

Alice in Wonderland, Lewis Carroll

Only at night

A. Rain fell that night, a

fine whispering rain.

Inkheart, Cornelia Funke

B. The night Max wore his wolf suit and made mischief of one kind and another.

Where the Wild Things Are, Maurice Sendak

C. It was 7 minutes after midnight.

The Curious Incident of the Dog in the Night-Time, Mark Haddon

Boredom: the desire for desires

A. Alice was beginning to get very tired of sitting by her sister on the bank, and of having nothing to do.

Alice's Adventures in Wonderland, Lewis Carroll

B. There once was a boy named Milo who didn't always know what to do with himself – not just sometimes, but always.

The Phantom Tollbooth, Norton Juster

C. I don't know why, but the meals we have on picnics always taste so much nicer than the ones we have indoors."

Five Go Off in a Caravan, Enid Blyton

Things can only get better

A. If, standing alone on the back doorstep, Tom allowed himself to weep tears, they

were tears of anger.

Tom's Midnight Garden, Philippa Pearce

B. When Mary Lennox was sent to Misslethwaite Manor to live with her uncle, everybody said she was the most disagreeable-looking child ever seen.

The Secret Garden, Frances Hodgson Burnett

C. Alice: How long is forever?

White Rabbit: Sometimes, just one second.

Alice in Wonderland, Lewis Carroll

D. "What day is it?" asked Winnie the Pooh.

"It's today," squeaked Piglet.

"My favourite day," said Pooh.

The Adventures of Winnie the Pooh, A. A. Milne

Love

A. Once there was a tree... and she loved a little boy.

The Giving Tree, Shel Silverstein

B. And Max, the king of all wild things, was lonely and wanted to be where someone loved him best of all.

Where the Wild Things Are, Maurice Sendak

C. "Now I see! We are all just dots, together!"

Not Just A Dot, Loryn

Brantz

D. There is nothing sweeter in this sad world than the sound of someone you love calling your name.

The Tale of Despereaux, Kate DiCamillo

Think!

A. "Hatred is so much easier to win than love - and so much harder to get rid of."

Six Cousins Again, Enid Blyton

B. Don't you know that everybody's got a Fairyland of their own?

Mary Poppins by P.L. Travers

C. How lucky I am to have something that makes saying goodbye so hard!

The Adventures of Winnie the Pooh, A. A. Milne

D. One sees clearly only with the heart. Anything essential is invisible to the eyes.

The Little Prince, Antoine De Saint-Exupery

E. "The moment you doubt whether you can fly, you cease forever to be able to do it."

Peter Pan, J.M. Barrie

Compiled by Jean Dsouza

SAVE YOURSELF FROM THE HEAT... AND SAVE THE ENVIRONMENT TOO

Who says only air conditioners can keep us cool? Here are some unusual ways to keep you cool this summer.

UNCLUTTER

A cluttered room feels hot! Remove unwanted furniture, pots and vases, newspapers and magazines from the room to make it more airy

LIGHT AND AIRY

Make your home as light as possible. Throw open the windows. Pack off heavy and synthetic drapes, dark and bold colour linen. Instead, invest in some thin and sheer curtains that look beautiful, provide privacy and keep the room cool.

BRING IN THE NATURE

As far as possible, leave the balcony, terrace and window door open. You can draw the curtains in the afternoons. Pick some flowers

from the garden or small green plants placed strategically in your house have a cooling effect.

A small plant near the main door also helps in cooling the house.

WATER BODIES

Keep interesting pots of water around the house. Set one bowl of ice-cold water in front of a moving fan. Add some fresh flowers or colour pebbles.

LIGHT IT RIGHT

Use less electricity. Lights and lamps can heat up the room. Instead go in for dim lights. Switch off electrical appliances if they are not in use as they too heat up the room.

So, turn off your computer and monitor when not in use, refrain from using oven, stove, dishwasher during afternoons as it increase the temperature in the area of the house.

DITCH THE INCANDESCENT LIGHTS.

Switch to CFLs, or compact fluorescent LED lamps. Incandescent bulbs waste about 90 percent of their energy in the heat they emit, so getting rid of these will make a difference in cooling your home and in lowering your electric bill.

COOL SPRAY

Keep a spray bottle filled with water in the refrigerator so that you can spray yourself at regular intervals. The evaporation of the water will cool down the blood flowing through your veins.

FAN IT

Make good use of all types of fans: ceiling fans, table fans and exhaust fans. Even before you switch on the AC, use the fan to cool off the room.

Set your ceiling fans to rotate counter-clockwise.

Whether you know it or not, your ceiling fan needs to be adjusted seasonally. Set counter-clockwise in the summer at a higher speed, the fan's airflow will create a wind-chill breeze effect that will make you and your guests "feel" cooler.

COOL CURTAIN

Hang a wet sheet by a window, which is open. This way you will get cool air from the water as it evaporates and blows toward you from the open window.

Focus on the temperature in your body, not the house.

If your ancestors survived without air conditioning, so can you.

From sipping tasty iced drinks to applying a cold cloth to strong-pulsed areas like your neck and wrists, cooling yourself from the inside out is not a bad idea.

TURN ON YOUR BATHROOM FANS.

...or the exhaust fan in your kitchen, for that matter. Both of these pull the hot air that rises after you cook or take a steamy shower out of your apartment.

COOL YOUR BED

Fill a hot water bottle and put it in the freezer before placing at the foot of your bed.

PAINT YOUR ROOF WHITE.

In much the same way the ice/snow reflects UV rays instead of absorbing the heat like the oceans do, cities are now giving white roofs a second look for cooling homes and fighting climate change. So paint your terrace and roof white to reflect heat.

KHUS CURTAIN

Khus Khus is something that we see commonly in small and medium-sized towns. A carpet of khus khus soaked in water is hung from the ceiling, spreading across the terraces. The carpet doesn't allow the heat in the air to pass through, and the water vapour evaporates, thus providing cool breeze for people living behind the layer.

ROOFTOP GARDENS

This interesting idea was suggested by Diptanu Chaudhuri, who says we can fight climate change and global warming by a simple solution of introducing rooftop plantations all over the world.

CAREER OPPORTUNITIES IN BIG DATA AND DATA ANALYTICS

By Harshal Arolkar

In September 2015 an article in Forbes shared some important facts about data. It mentioned that that Data is growing faster than ever before and by the year 2020, about 1.7 megabytes of new information will be created every second for every human being on the planet. By then, our accumulated digital universe of data will grow from 4.4 zettabytes (in September 2015) to around 44 zettabytes, or 44 trillion gigabytes. Within five years there will be over 50 billion smart connected devices in the world, all developed to collect, analyze and share data [1]. The article further mentioned that for a typical Fortune 1000 company, just a 10% increase in data accessibility can result in more than \$65 million additional net income. The most surprising fact was that less than 0.5% of all data is ever analysed and used. In this article we will have a birds view of Big Data and Data Analytics, where it is used, the skills you need to become a professional in the field.

The definition of Big Data, given by Gartner is, "Big data is high-volume, and high-velocity and/or high-variety information assets that demand cost-effective, innovative forms of information processing that enable enhanced insight, decision making, and process automation". There are unimaginable applications of Big Data in different domains; for example in financial sector, it is used by Credit card companies, retail banks, private wealth management advisories, insurance firms, venture finds, and institutional investment banks for customer analytics, compliance analytics, fraud analytics, operational analytics etc. Data Analytics is the science of examining raw data with the purpose of drawing conclusions about that information. It involves applying an algorithmic or mechanical process to derive insights. It is used in a number of industries like healthcare, travel, gaming, energy management, financial sector etc to allow the organizations and companies to make better decisions as well as verify and disprove existing theories or models. The figure summarizes what is big data and data analytics.

References:

huge rise in the requirement of professionals of Big Data as well as Data Analytics[2] by 2020. The graduate and post graduate students with very good Analytical skills (ability to be able to make sense of huge piles of data and able to determine which data is relevant to a solution), Creativity (ability to create new methods to gather, interpret, and analyze a data strategy), Mathematics & statistical skills (traditional number crunching cannot be overlooked anytime), Business skills (understanding of the business objectives that are in place, knowledge of the underlying processes that drive the growth of the business as well as its profit) and Computer science skills can easily become Big Data specialists. My guess is majority of the students pursuing their bachelors in commerce and business administration can now look at the opportunity of becoming Big Data specialists as they already have the required skillset.

To become a Data Analyst though you would require Programming skills specifically knowledge of R and Python, Statistical skills & mathematics, Machine learning skills, Data wrangling skills (ability to map raw data and convert it into another format that allows for a more convenient consumption of the data), Communication and Data Visualization skills and Data Intuition. Students of bachelor of computer applications or information technology can opt to become Data Analyst. Today it is a right time to look at new career opportunities and set our goal towards it.

During narco-analysis the subject is not in a position to speak up on his own but can answer specific but simple questions. Hence, prior to narco test of an accused, his criminal history is gathered and based upon that a questionnaire is prepared by a team of psychiatrics. Only one psychiatric is allowed to remain present in a room where the accused is kept in a trance position. By taking into confidence the accused, the psychiatric slowly and softly, one by one puts questions to the accused. The entire exercise is recorded through a camera. No police officer is allowed to enter into the room, where narco test is carried out. The answers are believed to be spontaneous as a semi-conscious person is unable to manipulate the answers.

Conclusion :

- The fundamental rights like right to remain silent, Right against Self-incrimination and right to live with dignity of the accused are violated during

INDUSTRY VISIT TO STERLITE TECHNOLOGIES (EliteCore)

The Faculty of Computer Technology (FCT), GLS University, organized a one day industrial visit/education tour to Sterlite Technologies (Ellitecore), Ahmedabad, for the elective students of Business Analysis. The trip was organized on 6th April 2017 for 15 students of FCT with the faculty coordinator, Dr. Devarshi Mehta.

The main purpose of

organizing the visit was to make students aware of the roles and responsibilities of a Business Analyst. Students interacted with Senior Business Analysts to know more about their field. They understood that Business Analysis enables change in an organizational context and the role of a business analyst is to provide a bridge between the client and the parent company, by defining their needs and recommending solutions that deliver value to stakeholders.

There students also observed live training and development processes along with documentation and other tools for Business Analysis. It was a great exposure for all the students.

WORKSHOP ON PERL PROGRAMMING

On 8th April 2017, the Faculty of Computer Technology, and the GLS Centre for Research & Development (GLSCRD) of GLS University jointly organised a one-day workshop on "PERL Programming" for the benefit of the teaching staff members of the Faculty of Computer Technology and the Faculty of Computer Applications & IT.

Mr. Maxwell Christian, Assistant Professor, GLS FCT, was the resource person for the workshop. 30 assistant professors of FCT and FCAIT actively participated in this workshop to get a hands-on experience in PERL Programming.

The main purpose of the workshop was to make the

faculty members aware of the programming potential of PERL in various technical domains. PERL is very powerful programming language. The main areas covered in the workshop were learning the basics and the techniques of PERL, and handling a database.

MOVIE REVIEW

BAAHUBALI-2: The Conclusion

By Nitin Pillai

Willingly suspend disbelief and brace yourself for a journey of epic proportion. Baahubali 2: The Conclusion delivers what its prequel promised, a roller coaster ride through the political labyrinths of Mahismati Kingdom. Do not expect novelty in the story. From Thomas Kyd to Manmohan Desai, everyone has utilized revenge stories. SS Rajamouli adheres to the age old formula of son seeking revenge for the wrongful usurpation and assassination of his father, however the director does experiment with the treatment of this revenge drama.

Both movies in this two part series present the audience with something of a rarity in Indian Cinema, and that is opulence and grandeur. You step into the cinema halls not expecting to see a reflection of your daily squabbles and the reality that surrounds us. You step in knowing fully that the director wants to transport you into a mythical land, a place where reason might

take a backseat but you are ok with it doing so. The script writer gives you the opening scene where a human, single-handedly, tames an elephant on a rampage and you tend to believe it. The movie also make you believe that a military coup under the shadow of the night can be fought with a handful of soldiers and some bulls with fiery horns, and you still believe it.

We believe it not because of the actors, due credit to them. We believe in this grandeur because of the story-

telling. It is undeniable that the magnum opus story by K.V. Vijendra Prasad (also the writer of Bajrangi Bhajan) could only be delivered by someone as visionary as SS Rajamouli (Magadheera and Eega being the other two novelties in his kitty). It's the majestic sets designed by Sabu Cyril that lend authenticity to the story of Baahubali. M.M Keeravani's thrilling music coupled with K.K.Senthil Kumar's avant grande cinematography catapults you into the world of Mahismati and you join the struggle for good to prevail over evil. Peter Hein with his stunts and R.C.Kamalakannan with his visual effects draw you into this story and they don't let you look away for even a moment.

It is the technical team that makes Baahubali 'the pride of Indian Cinema' (Rajnikant over Twitter). Well there are logical flaws in the story, but then we did ask you to suspend disbelief didn't we?

(The reviewer is an Asst. Professor in English and Communication at NRBBA)

ONE MORE YEAR OF R&P SEMINARS AT FACULTY OF BUSINESS ADMINISTRATION

By Dr. Rupali Singh

In a practice benchmarked from Indian Institute of Management (IIM) Ahmedabad, GLS University's Faculty of Business Administration (FBA) has been conducting Research & Publication (R&P) Seminars under its R&P Cell.

The philosophy behind these seminars is to encourage faculty members to share their ongoing research and for other team members to learn about inter-disciplinary areas of research. This not only fosters an understanding of parallel streams of research, but also encourages faculty members to engage in collaborative, inter-disciplinary research.

All faculty members of FBA as well as heads and faculty members of other faculties of GLS University are invited to the seminars, which are usually held in the afternoons. The presenting team member outlines his/her research along with a substantial background about the area. Over a cup of tea, members of the audience usually engage the presenter in a long Q&A session to better understand the research and find out how it can be connected to their own teaching or research.

The academic year 2016-17 saw ten R&P seminars conducted between October 2016 and April 2017.

The table below shows the various topics on which seminars were delivered.

Topic	Presenter
Teacher's Retention in Management Education	Dr. Rupali Singh
Deconstruction	Prof. Nitin Pillai
Gender Marginalisation	Prof. Nirja Vasavada
Neuro-Marketing	Dr. Belur Baxi
Employees as Brand Ambassadors	Prof. Dipalee Atre
Gujarat's Agricultural Development	Prof. Geetanjali Chauhan
Value Stream Mapping	Prof. Minal Joshi
Risk-Return Relationship and Impact of Diversification on unsystematic risk	Dr. Priyanka Zala
Banking Industry in India	Prof. Suruchi Sanadhya
Disclosure Practices of Selected Indian Companies	Prof. Seema Pandit

FBA's R&P Cell is keen to promote interdisciplinary research with members of other GLSU faculties. For the next series of seminars commencing from July 2017, we invite interested faculty members to submit their seminar proposals on research.nrbba@glsuniversity.ac.in by the 10th of every month.

(The writer is Asst. Professor at Faculty of Business Administration)

**OBITUARY**

“ Come to me , all you who are weary and burdened, And I will give you rest”

C. U. Shah Primary School deeply mourns the sad demise of Mrs. Malvika R. Vyas (Ex-Teacher) who left for her heavenly abode on Friday-14th April, 2017. May God give the departed soul eternal repose and grant her family the strength and courage to bear this irreparable loss.

The Principal and Staff
 (C. U. Shah Primary School)

B.D. Arts College FACULTY ACHIEVEMENT

Dr. Dharti H. Gajjar, faculty-Dept. of Home Science, B.D. College has been conferred the degree of Ph.D. by Hemchandracharya North Gujarat University for her thesis ' N U T R I T I O N A L UPLIFTMENT STUDIES OF M I C R O B I A L Y FERMENTED PROBIOTIC FOOD (HANDVA) PREPARED FROM INDIGENOUS FOOD INGREDIENTS' under the guidance of Dr. S.D.Joshi, Home science dept., Muni. Arts & Urban Science College, Mehsana and Dr. H.A.Modi, Life Science dept., Gujarat University, Ahmedabad.

GLS BIDS ADIEU TO RETIREES

Gujarat Law Society bid adieu to the teaching and non-teaching staff members of its various institutions on 8th April 2017 at the H.H. Auditorium in the GLS Campus. Upholding the tradition, Shri Sudhir Nanavati, the Executive Vice-president of GLS and the President of GLS University, gave his esteemed presence at the event. It has always been a matter of poignant and tender emotion that the head of such a vast institution and its principals, directors, and staff members would come together to bid goodbye to those who have ended their professional career here. Also present at the event were Dr. B.H. Joshi, Registrar, GLS, and Provost, GLS University, Dr. Hitesh Ruparel, Director General, GLS University, and the heads and faculty of various institutions.

The retirees of this year are:

Ms. Alkaben Pandya, Asst. Teacher at C.U. Shah Primary

School

Ms. Sushmitaben Shah, Head Clerk at C. U. Shah Primary School

Shri Manharbhai Patel, Asst. Teacher at GLS English Medium Primary School

Shri Nanjibhai Patel, Head Peon at N.R. Primary School

Shri M.L. Galliya, Asst. Teacher at M.K. Secondary and Higher Secondary School

Shri Natubhai Sharma, Asst. Teacher at N.R.

Secondary and Higher Secondary School

Ms. Gloria Christian, Head Clerk at City C.U. Shah College

Shri Y.P. Vaghela, Lecturer at Smt. Sadguna C.U. Arts

College of Girls

Dr. R.M. Vegda, Lecturer at Smt. L & C Mehta Arts College

We wish them good health and happiness for the rest of their lives.
